

TRIBECA

for extraordinary bathrooms

SCALE
&
LUXURY

Tribeca is a suite of architectural shower screens created for bathrooms where scale, strength, and design integrity matter. We engineered Tribeca for heavier features and bolder style.

ARCHITECTURAL SHOWER SCREEN SYSTEMS

TRIBECA

Turn a practical space
into a statement of style.

Tailor make your Tribeca with

- ✓ Sliding doors with soft open and close
- ✓ Pivoting doors
- ✓ Thicker glass in clear, translucent, or narrow reeded styles
- ✓ Fixed panels and returns
- ✓ Glazed highlight panels
- ✓ Vertical and/or horizontal feature bars
- ✓ Custom handles
- ✓ Custom finishes

The frame, feature bars, handles, and finishes allow interior architects to create design harmony and define spatial zones without cutting them off from the entire room. Every Tribeca system feels completely original and project-specific.

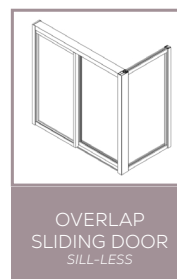

With sliding, pivot, and fixed panel formats, Tribeca gives interior architects a system equal to the most considered design brief.

The sliding door formats include a soft close feature to create an even more luxurious experience.

Tribeca is a shower screen system designed for generous proportions, thicker glass, and room defining presence.
